-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE THREE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/30/03
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 3673

Applicant is invited to file an IDS.

The specification (page 1 and page 15, line 24) must be amended to "update" the parentage of the application.

The "Abstract", (and possibly the "title") must be amended to recite what is now claimed.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 5,661,861 in view of Fanto-Chan, teaching in column 5, line 11, the equivalence of air and form as a filler for Torso supporting pillows, further in view of Emery, teaching the use of partitioning walls in inflatable pillows. It would have been obvious to one ordinarily skilled in the art at the time the invention was made to have used air in Matthews' Pillow, as taught by Fanto-Chan, because of the recognition of their equivalence, and to have partitioned such inflatable pillow, in view of Emery's recognition of the desirability of using partitions in inflatable pillows.

Art Unit: 3673

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Fanto-Chan or Zenoff, both teaching the use of generally U-shaped pillows in supporting methods for a user's Torso, but not specifying the use of an internal dividing wall, in view of Emery or Worcester, both teaching the use of dividers for inflatable pillows.

It would have been obvious to one ordinarily skilled in the art at the time the invention was made to have used a divider in Fanto-Chan's or Zenoff's pillows, because Emery and Worcester recognize the desirability of using dividers in inflatable pillows, in order to control their support characteristics.

It is noted that in method claims, limited patentable significance is given to structural limitations in articles that are used to implement the methods.
